Stake $FLOWFI. Earn every hour.

Lock your $FLOWFI for 1 to 12 months and earn every hour. Lock for 12 months and your stake ends at 3.5×. Your tokens never go to FlowFi: they sit in Streamflow's on-chain vault until your lock ends.

Everything happens in your FlowFi Wallet. Stake with your passkey or from another Solana wallet. Streamflow runs underneath.

THE WHOLE SYSTEM IN 4 STEPS

01
Pick an amount and a lock
1, 3, 6 or 12 months. Longer locks get a bigger boost: 12 months ends at 3.5×.

02
Approve once, in your Wallet
Approve with your passkey (FlowFi Wallet) or in your other wallet. Your $FLOWFI moves into the vault on Solana, and a frozen receipt token in your wallet proves your stake.

03
Earn every hour
Your rewards are calculated every hour and shown live in your Wallet. Claim them anytime.

04
Unstake or renew
When the lock ends, your full $FLOWFI goes back to the wallet that staked it. Or stake again.

12 months = 3.5× your tokens

+5.9%	+25%	+75%	+250%
1 month · 1×	3 months · 1.45×	6 months · 2.12×	12 months · 3.5×

Lock for 12 months and your stake ends at 3.5×. Shorter locks earn the same way for their shorter time, at a lower boost.

YOU STAKE 1,000,000 $FLOWFI FOR...	BOOST	AT UNLOCK YOU HAVE
1 month	1×	≈ 1,058,700
3 months	1.45×	≈ 1,255,400
6 months	2.12×	≈ 1,746,600
12 months	3.5×	**3,500,000** (≈ 6,849 earned a day)

Where the rewards come from

FlowFi funds a dedicated rewards pool on Streamflow before you stake (its balance is public on Solscan) and tops it up ahead of time. **Round 1 holds up to 10,000,000 $FLOWFI** in total, so every reward is funded. Separate from the Wheel, and staking still counts for it (page 2).

The FlowFi Wheel V3

The Wheel is how FlowFi gives back to $FLOWFI holders, every hour, on-chain. V3 pays the top 100 holders, and it counts what you stake: wallet + staked.

HOW THE MONEY MOVES

1 · FlowFi earns
50% of all FlowFi creator rewards buys $FLOWFI for the Wheel.

2 · Rewards wallet
Holds the $FLOWFI to pay out. Every send is public on Solscan.

3 · Every hour
10% of the wallet, counted on 1M max: up to 100,000. Never more.

4 · Top 100
All of it goes to the top 100 qualifying holders.

Who gets the Wheel

- **Who:** the 100 biggest qualifying holders, ranked by **wallet + staked**.
- **To qualify:** hold for 3+ days. Not over 4% of supply. Team wallets, pools and locks are left out.
- **Your share:** your wallet + staked balance × holding time (30+ days 1.5×) × taking part (signed in to FlowFi this week 1.25×).
- **How you get it:** straight into your wallet (the one you staked from) every hour. Nothing to claim.

Staking never lowers your Wheel. The Wheel counts your total. Hold 20,000,000 $FLOWFI and stake 10,000,000 of it: the Wheel ranks and pays you on all 20,000,000, and the 10,000,000 staked also earns its staking rate.

Fair-play rules (unchanged)

- **No wallet takes more than 5% of one payout.** What's above the cap is shared by everyone else.
- **Buying a minute before a payout doesn't count:** your balance is the lower of the last two hours.
- **Selling more than half restarts your holding time.** Moving tokens into staking doesn't.

What changed from V2

	WHEEL V2	WHEEL V3
Who gets paid	Every qualifying holder	The top 100 qualifying holders
What counts	Wallet	Wallet + staked
Holding time, 1.25×, limits	Yes	Same

Why you can trust it

- **Built on Streamflow,** a Solana protocol projects use for token vesting, locks and staking. FlowFi uses it for the founder's own $FLOWFI lock too.
- **FlowFi never holds your tokens.** They sit in the staking program's on-chain vault. Nobody can withdraw them before your unlock, FlowFi included. At unlock, only your wallet can take them back.
- **The rules can't change.** Lock lengths and boosts are fixed when the pool is created. Nobody can edit them afterwards.
- **Your stake lives on Solana, not on FlowFi's servers.** It's recorded in Streamflow's program under your wallet. Your receipt token stays frozen in your wallet, so it can't be sent away by mistake: it's what proves the stake is yours.
- **Audits.** Streamflow states its protocol has gone through multiple independent security audits (developers.streamflow.finance › Security audits).

Still counts as held

- **Pro, Pro+ and Elite:** staked $FLOWFI counts toward your tier. Staking never drops your tier.
- **The Wheel:** it counts your total, wallet + staked. Hold 20M $FLOWFI and stake 10M of it: the Wheel ranks and pays you on all 20M.
- **Holding time:** moving $FLOWFI into staking doesn't reset how long you've held.

Know the risks

- **Locked means locked.** You can't sell or move staked $FLOWFI until it unlocks. There is no early exit and no penalty option.
- **Rewards depend on the pool.** They're paid from the staking rewards pool FlowFi funds. This round's rate stays as shown when you stake; a different rate would come as a new round, announced first.
- **Price risk.** $FLOWFI's price can go down while it is locked.
- **Smart-contract risk** exists in any on-chain program. Only stake what you're comfortable locking away.

Costs

FlowFi takes **no fee**. You pay Solana network fees (a fraction of a cent) and a small account deposit for your stake, which comes back when you unstake and close it. Staking from your FlowFi Wallet? Keep about 0.01 SOL in it.

Questions, answered

Can I unstake early?
No, and there's no penalty option either: the program refuses any unstake before your date. Want flexibility? Pick 1 month.

Where do I see my stake?
In your FlowFi Wallet, right under your balance: amount locked, time left, rewards earned and the unlock date.

When are rewards paid?
Staking rewards are calculated every hour: claim them from your Wallet anytime. Wheel payouts (top 100) drop straight into the wallet you staked from, nothing to claim.

How much will I earn?
12 months: your stake ends at 3.5× (100,000 → 350,000). 1 month +5.9%, 3 months +25%, 6 months +75%. Your Wallet shows it live.

Do I still get the Wheel?
Yes. The Wheel counts wallet + staked, so staking never lowers it. If you meet the criteria (top 100, held 3+ days) The Wheel payout drops into the wallet you staked from. Nothing to claim.

Do I keep Pro?
Yes. Staked $FLOWFI counts toward Pro, Pro+ and Elite like tokens in your wallet.

What happens when my lock ends?
Nothing moves on its own. Unstake to get your $FLOWFI back, or stake again for a new term.

Can I add to a stake?
Each stake has its own amount and lock. Staking more creates a new stake with its own unlock date.

Which wallet can I use?
Your FlowFi Wallet (approve with your passkey) or another Solana wallet. Your $FLOWFI always comes back to the wallet that staked it.

Is there a limit?
No minimum. Round 1 holds up to 10,000,000 $FLOWFI in total; when it's full, staking closes until the next round. Your Wallet shows what's left.

What if FlowFi's site goes down?
Your stake lives on Solana in Streamflow's program, not on FlowFi's servers. It stays recorded under your wallet, and Streamflow's tools are public.

Do I need to go to Streamflow?
No. Staking, claiming and unstaking are all done from your FlowFi Wallet. Streamflow is the on-chain program FlowFi uses underneath.

Who pays the rewards?
FlowFi funds the staking rewards pool. Nothing comes out of other stakers' tokens. The Wheel is separate and pays the top 100.

Can FlowFi take my tokens?
No. Only the staking program holds them, and only your wallet can withdraw them after the unlock date.

Ready? Stake from your Wallet.
